

FANELESIBONGE HLEBANI

Fanelehlebani@gmail.com | github.com/sov3r3ign | [LinkedIn](#) | +27636327769 | Gqeberha, South Africa

PROFILE

IT graduate skilled in C#, Java, Python, and JS, with experience in full stack development using Node.js and Angular. I have a strong foundation in OOP and software design, with hands-on project experience and a passion for building systems that solve real world problems.

EDUCATION

Bachelor of Information Technology | **Nelson Mandela University**

Completed all required academic obligations – Degree conferral pending (April 2026)

EXPERIENCE

Peer Technical Support (Student)

- I provided technical assistance to students within residence.
- Troubleshoot software and basic network related issues.
- Supported users with system setup and your general IT challenges.

PROJECTS

SafeZone (A community Crime reporting system) empowering communities

- Developed this full-stack mobile application using Flutter and Supabase for the backend as first time implementation of both technologies.
- Integrated PostgreSQL database via Supabase for secure user authentication and incident data management.
- Designed real-time crime reporting pipeline with live location tracking.
- Managed version control using Git for collaborative development and code management.

StudyQuest (Learning Management System) – Android +SQLite

- Integrated SQLite databases to manage student records.
- Designed and implemented responsive, user-friendly UI components in Android studio (Java).
- Collaborated on frontend to backend integration and documentation.
- Applied collaborative version control workflows through Git across the full team build cycle.

SheGuardian – Telkom 10x Hackathon (Gqeberha) Improving safety for woman across the country

- Developed the helper smartwatch component of a React Native mobile application to enhance female safety.
- Enabled real-time alerts, location and emergency notifications through smartwatch communication.
- Recognized for social impact, by combining innovation with practical problem-solving.
- Collaborated in a team environment to deliver a working prototype within a hackathon deadline

SKILLS

Languages: Python, Java, HTML, CSS, JS, C#

Backend development: Node.js, ASP.NET Core

Databases: SQL Server, MySQL, Supabase, Firebase

Professional: Ethical Judgement, Analytical Problem Solving, Agile Delivery

Concepts: SDLC, Object-Oriented Programming
